

Final Project Report

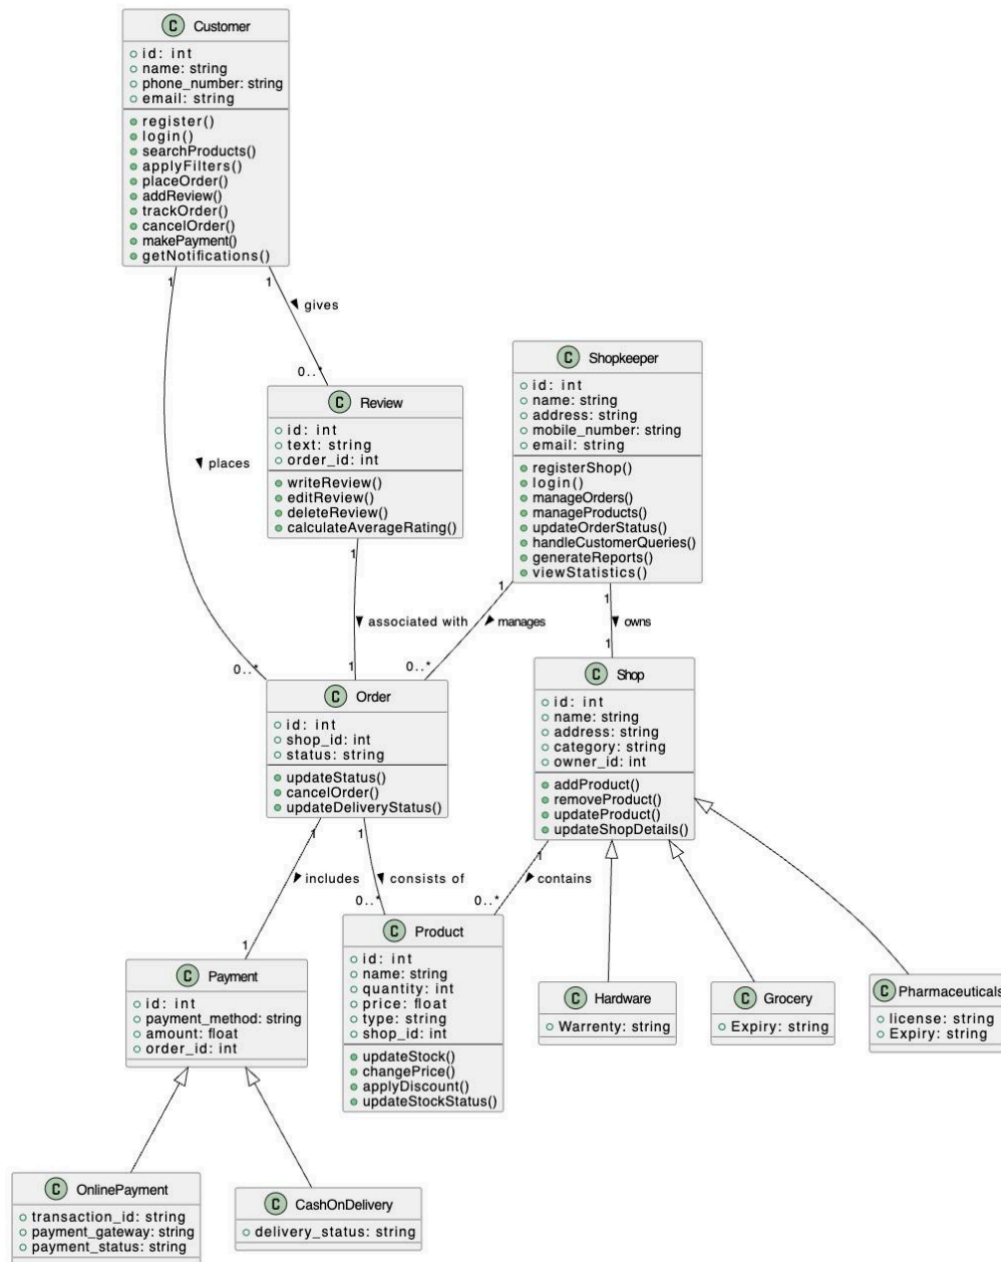

Architecture of the system

The system_aims to help people access local nearby businesses and be able to buy from them efficiently with the business being able to sell efficiently as well.

Class Diagram for NearBuy:

Every customer will have a detailed profile and their preferences will be saved.

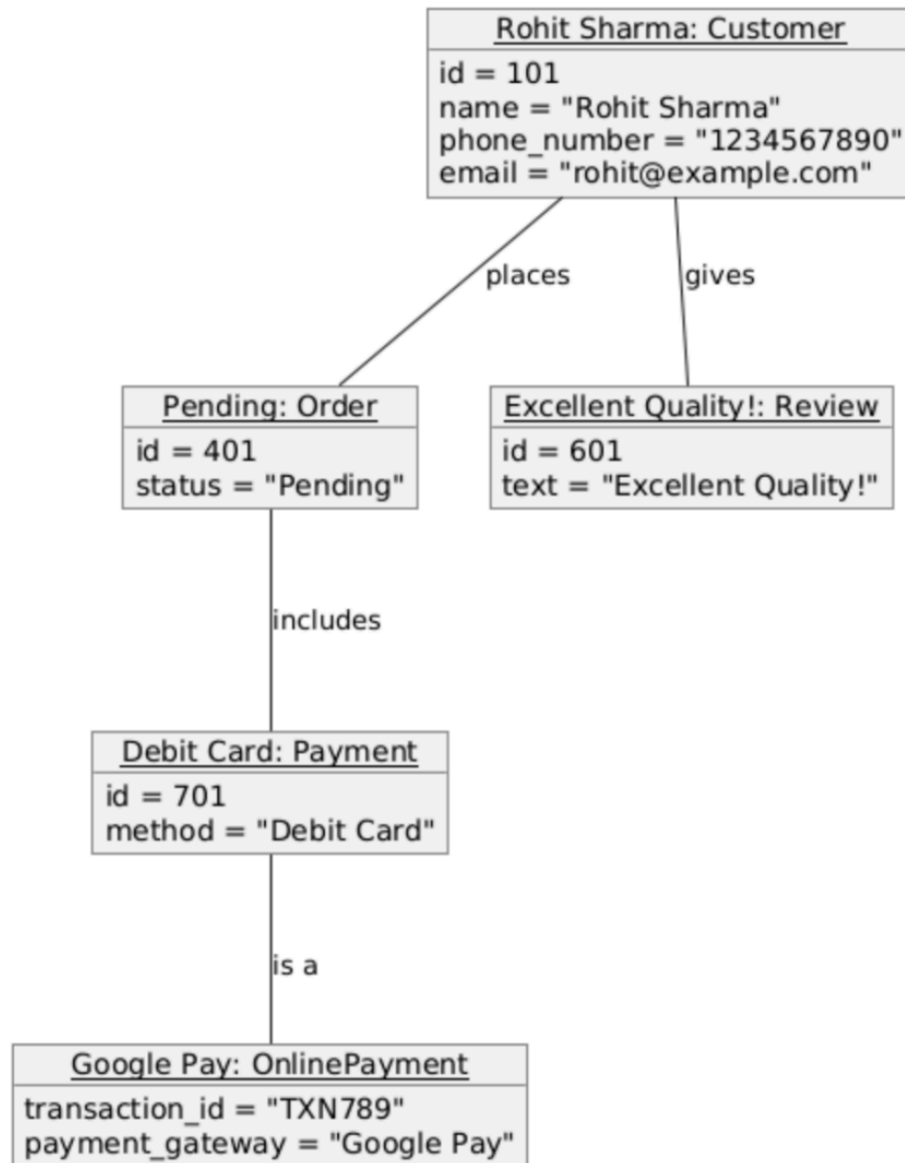

All-in-one digital platform designed to bridge the gap between local businesses and the communities they serve. In an age where large e-commerce giants dominate online sales

With a mission to support economic sustainability and promote neighborhood entrepreneurship offers a robust suite of tools that enable businesses to market their products, connect with nearby customers, and grow their presence—both online and offline.

One of NearBuy's standout features is its integrated community engagement tools. The platform allows businesses to post updates, promote events, offer special deals, and even collaborate with other local vendors to create bundled promotions or themed shopping experiences. Customers, in turn, can follow their favorite stores, leave reviews, share recommendations, and join local loyalty programs—all within the app.

Whether you're a local artisan looking to expand your reach, a resident searching for unique products close to home, or a city official aiming to revitalize the local economy, NearBuy is your digital companion for building stronger, more vibrant communities—one purchase at a time.
